

PROJECT TITLE:

Drainage Improvements

WHY THIS PROJECT?

The City owns and operates almost 160 miles of storm drain channels and pipes, many of which are of unknown size and materials. The City is in the process of obtaining inventory and condition data for two priority areas in order to develop and maintain a Storm Drain Asset Management Plan and Capital Improvement Program to prioritize and plan storm drain maintenance, repairs, rehabilitation, and improvements.

PROJECT BENEFITS:

Development of a comprehensive Storm Drain Asset Management Plan and Capital Improvement Program will allow the City to prioritize and plan storm drain maintenance, repairs, rehabilitation, and improvements, thereby reducing the number of emergency repairs and improving the City's storm drain system.

QUICK FACTS

Location: Citywide

Total Project Costs: Fiscal Year 2020 - \$900,000

Funding Source: Measure C
